(1) Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month.

(1) Les statistiques sur les arrêts de travail comprennent tous les lock-outs et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés n'est pas compris. Les données sont publiées 45 jours civils après la fin du mois de référence.

(2) The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total.

(2) Le total tient compte de tous les arrêts de travail. L'agriculture, les finances, les assurances, les affaires immobilières ainsi que l'administration publique et la défense, ne sont pas indiquées séparément. S'il y avait eu des grèves dans ces industries, les journées perdues auraient été comprises dans le total.

(1) Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month.

(1) Les statistiques sur les arrêts de travail comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés n'est pas compris. Les données sont publiées 45 jours civils après la fin du de référence.

(2) The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total.

(2) Le total tient compte de tous les arrêts de travail. L'agriculture, les finances, les assurances, les affaires immobilières ainsi que l'administration publique et la défense, ne sont pas indiquées séparément. S'il y avait eu des grèves dans ces industries, les journées perdues auraient été comprises dans le total.

Payroll and Hours are not strictly comparable with those for earlier months because of improvements in sampling methodology Adjustment factors to calculate growth rates across this statistical break are available from Statistics Canada
Notes: 1 Les services incluent l'électricité 2 Les données extraites de l'Enquête sur l'emploi la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des précédents, en raison d'améliorations apportées à la méthode d'échantillonnage Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987.

Pension Plans in Canada 1984

Régimes de pensions au Canada 1984

Rapid Change and Growth!

Changements et croissance rapides!

With the aging of Canada's population, the adequacy of the present system of income maintenance is an ever-present concern. **Pension Plans in Canada, 1984** is the seventh in a series of studies on the private pension system. It contains all the relevant details on continuing changes to the 17,700 employer-sponsored pension plans in Canada.

Key characteristics from earlier editions are updated. Within its 96 pages, terms, conditions, trends and developments are explored and highlighted with six charts and 90 tables and text.

Data are included for all occupational pension plans sponsored by employers in both public and private sectors. Such areas as vesting, contribution rates, benefit formulae, eligibility conditions, integration with Canada and Quebec pension plans, retirement ages, pension indexing, contributions paid by employers and employees, number of pensioners and amounts of benefits paid under these plans are studied in historical context. Also included are data on contributors to RRSP's.

Catalogue No. 74-401, $50 in Canada, $51 other countries.

Avec le vieillissement de population canadienne, l'adéquation du système actuel de sécurité du revenu est une préoccupation constante. **Régimes de pensions au Canada, 1984** est la septième d'une série d'études sur les régimes privés de retraite. Elle contient tous les détails pertinents sur l'évolution permanente des 17,700 régimes de retraite offerts par les employeurs au Canada.

Les renseignements principaux des éditions sont mis à jour. Les conditions, les tendances et les faits nouveaux survenus sont analysés en 96 pages et mis en relief grâce à six graphiques, à 90 tableaux et au texte explicatif.

Les données portent sur tous les régimes de retraite offerts par les employeurs des secteurs public et privé. Les auteurs étudient dans un contexte historique l'acquisition des droits, les taux de cotisation, les prestations prévues, les conditions d'admission, l'intégration au Régime de pensions du Canada et au Régime de rentes du Québec, l'âge de la retraite, l'indexation des prestations, la quote-part patronale et la cotisation des employés, le nombre de pensionnés et le montant des prestations versées en vertu de ces régimes. Ils présentent également des données sur la participation à des REÉR.

(1) Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month.

(1) Les statistiques sur les arrêts de travail comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés n'est pas compris. Les données sont publiées 45 jours civils après la fin du mois de référence.

(2) The total includes all work stoppages. The agriculture, forestry, fishing and trapping, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total.

(2) Le total tient compte de tous les arrêts de travail. L'agriculture, les forêts, les pêches et le piégeage, les finances, les assurances, les affaires immobilières ainsi que l'administration publique et la défense, ne sont pas indiquées séparément. S'il y avait eu des grèves dans ces industries, les journées perdues auraient également été comprises dans le total

(1) Services include electric utilities. Starting in January 1987, data taken form the Survey of Employment, Payroll and Hours are not strictly comparable with those for earlier months because of improvements in sampling methodology. Adjustment factors to calculate growth rates across this statistical break are available from Statistics Canada

(1) Les services incluent l'électricité. Les données extraites de l'Enquête sur l'emploi, la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des mois précédents, en raison d'améliorations apportées à la méthode d'échantillonnage. Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987

TWO SOURCES OF INTERNATIONAL TRADE STATISTICS PUBLISHED EVERY MONTH

DEUX SOURCES DE DONNÉES SUR LE COMMERCE INTERNATIONAL PUBLIÉES CHAQUE MOIS

Follow the direction and patterns of Canada's trade with 200 countries in over 5,000 commodities. Consult **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

These publications give current month totals of value and volume of commodities traded and cumulative totals for the year. And with the recent switch to the "Harmonized System" of commodity coding, international comparisons of trade data are easier because identical products traded internationally are identified by the same code.

Order the publications that manufacturers, international traders, governments, labour and trade associations have come to rely on for up-to-date, comprehensive trade statistics: **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

Pour connaître les mouvements et la répa tition de plus de 5 000 marchandises ent le Canada et 200 pays, consultez ***Import tions par marchandise (Base du S.H.)*** ***Exportations par marchandise (Ba du S.H.)***.

Ces publications vous donnent les chiffr de la valeur et du volume des échang de marchandises du mois et les chiffr cumulatifs pour l'année. Grâce l'adoption du Système harmonisé d codification des marchandises, il e maintenant plus facile de comparer l données sur le commerce interna tional, car les produits identiqu échangés entre les pays sont désign par le même code.

Procurez-vous les deux publications qu'ut lisent les fabricants, les importateurs, l exportateurs, les gouvernements ainsi que l associations ouvrières et commerciales pou obtenir des statistiques récentes et compl tes sur le commerce: ***Importations p marchandise (Base du S.H.)*** et ***Export tions par marchandise (Base du S.H.)***.

THE NEWS BEHIND THE NUMBERS

The 1986 Census Data Base collected the numbers on Canadians – but what do they mean to you? The *FOCUS ON CANADA* Series analyses the issues that emerged from the Census results, in an easy-to-read style.

FOCUS ON CANADA looks at the issues affecting Canada's seniors and its youth, its ethnic and aboriginal communities; its regions in the far north and the industrial south.

And there's much more to keep you informed – and enlightened. Each publication is bilingual, and costs $10 in Canada (US$11 in other countries). Order the full set of 16 for a comprehensive reference tool for home, school or office.

CE QUI SE CACHE DERRIÈRE LES CHIFFRES

La base de données du recensement de 1986 renferme des chiffres sur les Canadiens. Mais que signifient-ils? La série LE CANADA À L'ÉTUDE analyse les questions qui proviennent des résultats du recensement, et ce, dans un style accessible.

LE CANADA À L'ÉTUDE examine les questions qui touchent les personnes âgées et les jeunes, les groupes ethniques et les autochtones, les régions éloignées du Grand Nord et la région industrialisée du sud du Canada.

De plus, cette série vous informe et vous éclaire grâce à d'innombrables autres renseignements. Chaque publication est bilingue et se vend 10 $ au Canada (11 $ US à l'étranger). Commandez l'ensemble des 16 publications de façon à obtenir un outil de référence par excellence pour la maison, l'école ou le bureau.

(1) Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month. - Les statistiques sur les arrêts de travail comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés n'est pas compris. Les données sont publiées 45 jours civils après la fin du mois de référence.

(2) The total includes all work stoppages. The agriculture, forestry, fishing and trapping, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total. - Le total tient compte de tous les arrêts de travail. L'agriculture, les forêts, les pêches et le piégeage, les finances, les assurances, les affaires immobilières ainsi que l'administration publique et la défense, ne sont pas indiquées séparément. S'il y avait eu des grèves dans ces industries, les journées perdues auraient également été comprises dans le total.

(1) Les données extraites de l'Enquête sur l'emploi, la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des mois précédents, en raison d'améliorations apportées à la méthode d'échantillonnage. Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987.

Note: These fixed-weighted series are generally larger than the variable-weighted series in Table 2.11 because they apply to all employees rather than just hourly-rated employees. For details on how these fixed-weighted indexes are constructed see the article in the September 1989 issue of the CEO. Contact: P. Smith (951-9158).
Nota: Ces séries à pondération fixe sont dans l'ensemble plus élevées que les séries à pondération variable du tableau 2.11 parce qu'elles couvrent tous les salariés et non pas seulement les employés rémunérés à l'heure. L'article de l'édition de septembre 1989 de L'O.É.C. décrit en détail la construction de ces indices à pondération fixe. Personne ressource: P. Smith (951-9158).

(1) Prestations de sécurité de la vieillesse, suppléments de revenu garanti et allocations au conjoint.
(2) Monthly estimates are not official audited figures: the annual estimates are, and do not equal the sum of the months because of adjustments made after the fiscal year.
(2) Les estimations mensuelles ne correspondent pas aux chiffres des comptes officiels: les estimations annuelles ne sont pas tout-à-fait égales à la somme des mois en raison d'ajustements apportés après la fin de l'année fiscale.

Notes: Starting in January 1987, data taken from the Survey of Employment, Payroll and Hours are not strictly comparable with those for earlier months because of improvements in sampling methodology. Adjustment factors to calculate growth rates across this statistical break are available from Statistics Canada.
Notes: Les données extraites de l'Enquête sur l'emploi, la rémunération et les heures de travail ne sont plus, depuis janvier 1987, tout à fait comparables à celles des mois précédents, en raison d'améliorations apportées à la méthode d'échantillonnage. Il est possible de se procurer, auprès de Statistique Canada, les facteurs de correction permettant d'obtenir des taux de croissance comparables pour les séries antérieures et postérieures à janvier 1987.

TWO SOURCES OF INTERNATIONAL TRADE STATISTICS PUBLISHED EVERY MONTH

DEUX SOURCES DE DONNÉES SUR LE COMMERCE INTERNATIONAL PUBLIÉES CHAQUE MOIS

Follow the direction and patterns of Canada's trade with 200 countries in over 5,000 commodities. Consult **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

These publications give current month totals of value and volume of commodities traded and cumulative totals for the year. And with the recent switch to the "Harmonized System" of commodity coding, international comparisons of trade data are easier because identical products traded internationally are identified by the same code.

Order the publications that manufacturers, international traders, governments, labour and trade associations have come to rely on for up-to-date, comprehensive trade statistics: **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

Pour connaître les mouvements et la répartition de plus de 5 000 marchandises entre le Canada et 200 pays, consultez ***Importations par marchandise (Base du S.H.)*** et ***Exportations par marchandise (Base du S.H.)***.

Ces publications vous donnent les chiffres de la valeur et du volume des échanges de marchandises du mois et les chiffres cumulatifs pour l'année. Grâce à l'adoption du Système harmonisé de codification des marchandises, il est maintenant plus facile de comparer les données sur le commerce international, car les produits identiques échangés entre les pays sont désignés par le même code.

Procurez-vous les deux publications qu'utilisent les fabricants, les importateurs, les exportateurs, les gouvernements ainsi que les associations ouvrières et commerciales pour obtenir des statistiques récentes et complètes sur le commerce : ***Importations par marchandise (Base du S.H.)*** et ***Exportations par marchandise (Base du S.H.)***.

(1) Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data are published 45 days after the end of reference month. - Les statistiques sur les arrêts de travail comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés n'est pas compris. Les données sont publiées 45 jours civils après la fin du mois de référence.

(2) The total includes all work stoppages. The agriculture, forestry, fishing and trapping, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total. - Le total tient compte de tous les arrêts de travail. L'agriculture, les forêts, les pêches et le piégeage, les finances, les assurances, les affaires immobilières ainsi que l'administration publique et la défense, ne sont pas indiquées séparément. Note: These fixed-weighted series are generally larger than the variable-weighted series in Table 2.12 because they apply to all employees rather than just hourly-rated employees. For details on how these fixed-weighted indexes are constructed see the article in the September 1989 issue of the CEO. Contact: P. Smith (951-9158).
Nota: Ces séries à pondération fixe sont dans l'ensemble plus élevées que les séries à pondération variable du tableau 2.12 parce qu'elles couvrent tous les salariés et non pas seulement les employés rémunérés à l'heure. L'article de l'édition de septembre 1989 de L'O.É.C. décrit en détail la construction de ces indices à pondération fixe. Personne ressource: P. Smith (951-9158).

What grains are 300,000 Canadian farmers planting?

A copy of the **Field Crop Reporting Series** will tell you that, and much more.

Anyone interested in the agriculture economy and its products depends on this Series for critical crop information – agriculture associations and producers, marketing boards and farm organizations, regional developers and agricultural policy makers.

Compiled from regular surveys of 10,000 Canadian farmers, eight issues are released at strategic points during the crop year.

The first crop acreage report in March contains producers' planting intentions, followed by estimates in June after most of the seeding is completed. Yields and levels of production by province are estimated in August and September. The Series concludes with a November post-harvest report.

Three Canadian grain stock reports list the farm-held stocks at the provincial level and the farm-held plus commercial stocks at the Canadian level at the end of December, March and July.

You get detailed, reliable and timely estimates on seeding intentions, current acreage, quality and quantity of stocks, progress of harvesting and production.

Take stock of Canada's major grains.

A subscription to the **Field Crop Reporting Series** (Catalogue No. 22-002) is $80 in Canada, US$96 in the United States and US$112 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Quelles céréales les 300 000 agriculteurs canadiens cultivent-ils ?

La **Série de rapports sur les grandes cultures** vous fournira ces renseignements et bien d'autres.

Quiconque s'intéresse à l'économie agricole et à ses produits s'en remet à cette série pour obtenir des renseignements essentiels sur les cultures. La série est particulièrement utile aux associations agricoles et aux producteurs, aux offices de commercialisation et aux organismes agricoles, aux aménagistes et aux responsables de l'élaboration de politiques agricoles.

Huit numéros, préparés à partir d'enquêtes menées régulièrement auprès de 10 000 agriculteurs canadiens, sont publiés à des moments stratégiques de la campagne agricole.

Le premier rapport sur la superficie ensemencée, qui paraît en mars, donne des renseignements sur les intentions d'ensemencement des producteurs. Le rapport de juin fournit des estimations une fois que la majeure partie des semences sont terminées. Les numéros d'août et de septembre présentent des estimations relatives aux rendements et aux niveaux de production. Le rapport de l'après-récolte (novembre) clôt la série.

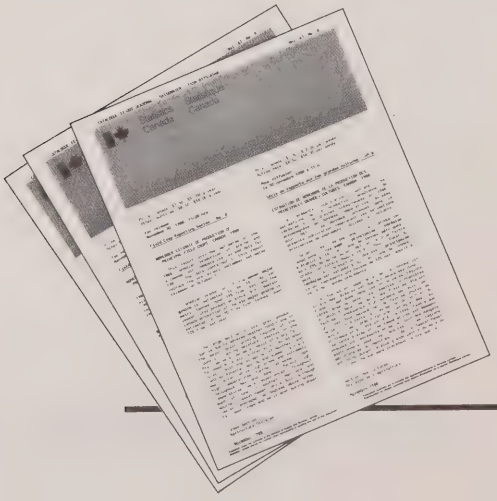

Trois rapports sur les stocks de céréales au Canada indiquent l'état des stocks des exploitations agricoles à l'échelle provinciale ainsi que l'état des stocks des exploitations agricoles et des stocks commerciaux à l'échelle nationale, à la fin de décembre, de mars et de juillet.

Vous obtenez en temps opportun des estimations détaillées et dignes de foi sur les intentions d'ensemencement, la superficie ensemencée, la qualité et la quantité des stocks, la progression des récoltes et la production.

Renseignez-vous sur les produits fabriqués au Canada

La publication intitulée **PRODUITS LIVRÉS PAR LES FABRICANTS CANADIENS** constitue la liste la plus exhaustive de la valeur et de la quantité de plus de 4 500 produits expédiés par les entreprises de fabrication canadiennes.

Le rapport fournit une analyse comparée de tous les produits fabriqués au Canada en 1984, 1985 et 1986. Il permet aux fabricants, aux experts-conseils en recherche et aux organismes commerciaux et autres d'évaluer leur place concurrentielle sur les marchés ainsi que d'obtenir un aperçu du secteur manufacturier.

Les produits énumérés vont des turbines hydrauliques aux pâtes alimentaires, en passant par les pailles en plastique.

Il s'agit du dernier numéro à se servir de la classification des produits industriels; il comprend des données provinciales pour 1986.

TWO SOURCES OF INTERNATIONAL TRADE STATISTICS PUBLISHED EVERY MONTH

DEUX SOURCES DE DONNÉES SUR LE COMMERCE INTERNATIONAL PUBLIÉES CHAQUE MOIS

Follow the direction and patterns of Canada's trade with 200 countries in over 5,000 commodities. Consult **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

These publications give current month totals of value and volume of commodities traded and cumulative totals for the year. And with the recent switch to the "Harmonized System" of commodity coding, international comparisons of trade data are easier because identical products traded internationally are identified by the same code.

Order the publications that manufacturers, international traders, governments, labour and trade associations have come to rely on for up-to-date, comprehensive trade statistics: **Imports by Commodity (H.S. Based)** and **Exports by Commodity (H.S. Based)**.

Pour connaître les mouvements et la répartition de plus de 5 000 marchandises entre le Canada et 200 pays, consultez ***Importations par marchandise (Base du S.H.)*** et ***Exportations par marchandise (Base du S.H.)***.

Ces publications vous donnent les chiffres de la valeur et du volume des échanges de marchandises du mois et les chiffres cumulatifs pour l'année. Grâce à l'adoption du Système harmonisé de codification des marchandises, il est maintenant plus facile de comparer les données sur le commerce international, car les produits identiques échangés entre les pays sont désignés par le même code.

Procurez-vous les deux publications qu'utilisent les fabricants, les importateurs, les exportateurs, les gouvernements ainsi que les associations ouvrières et commerciales pour obtenir des statistiques récentes et complètes sur le commerce : ***Importations par marchandise (Base du S.H.)*** et ***Exportations par marchandise (Base du S.H.)***.
